Get the Cooling Power of Amana® Brand Air Conditioners

The Amana brand has a long reputation for providing quality and innovation in home appliances, and our heating and air conditioning products are made with the same level of commitment. You can expect years of dependable service from your Amana brand ASXC16 ComfortNet™ Communicating Systems-compatible R-410A Air Conditioner. Why suffer through hot, humid days with an inefficient, noisy, lower SEER air conditioner, when an Amana brand ASXC16 unit with chlorine-free R-410A refrigerant can consistently deliver quiet, energy-conserving comfort?

Energy-Saving Efficiency

When properly matched and installed, your Amana brand ASXC16 Air Conditioner offers up to 16 SEER high-efficiency performance. “SEER” stands for Seasonal Energy Efficiency Ratio, a measure used by the U.S. Department of Energy to rate the efficiency of air conditioners and heat pumps. The higher the SEER, the greater the efficiency — and the lower the operating cost. Compared to lower SEER units found in many homes, an ASXC16 Air Conditioner can provide significant savings on your electric bill.

With Amana brand Air Conditioners, your comfort and savings start with a high-efficiency Copeland® Scroll compressor. This high-quality component uses time-tested compression technology and features overload protection. The efficient design of the scroll compressor is complemented by our efficient condensing coil, which is made with corrugated aluminum fins and refrigeration-grade copper tubing.

In many applications, the efficiency of your Amana brand ASXC16 Air Conditioner can be enhanced by using it in conjunction with an Amana brand Gas Furnace, Air Handler, or Modular Blower that includes a variable-speed blower motor. Talk to your Amana brand dealer about opportunities to increase the efficiency of your new unit.

What is R-410A?

Compared to lower SEER R-22 refrigerant units, our new Amana brand ASXC16 Air Conditioner will not only provide you with energy-efficient cooling performance for many years, but it also features R-410A refrigerant. This refrigerant does not contain chlorine. Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of compressors.

Experience Quiet Comfort

You can be assured that your Amana brand Air Conditioner will provide you with quiet operation. To minimize operating sounds, we’ve acoustically engineered our systems with enhancements that include a compressor sound-reduction cover made of high-density foam and a specially- designed sound-control top. Additionally, the two-speed operation of the condenser fan motor allows your outdoor fan to typically run more often at a lower speed, creating lower operating sound overall as compared to units without this feature.

Commitment to Quality Engineering

Always in pursuit of the highest performance and efficiency, our engineers are constantly evaluating the latest technology and applying it to every Amana® brand air conditioner. This commitment to constant improvement ensures that our units continue to meet or surpass industry standards. The Amana brand line of air conditioners is designed and built to ensure dependable operation with continuous, trouble-free cooling comfort.

But best of all, the operation of your air conditioner can be monitored and reviewed by your contractor with the use of the ComfortAlert™ Diagnostics module that we

build into all of our premium Amana brand units. This module monitors data from the unit and accurately detects the cause of system-related issues.

Added Comfort Protection

For even greater peace of mind, ask your dealer or visit our website at www.amana-hac.com for more details about Asure,™ an affordable Parts and Labor Extended Service Plan for your entire Amana brand HVAC system.†

AMANA® BRAND QUALITY

Americans have been relying on long-lasting Amana brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

From the technology behind our Million-Air® heat exchanger to what we believe to be the industry's best warranties* to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to the Amana brand's legacy of providing consumers with premium heating and cooling products that are built to last.

Look to your qualified Amana brand dealer to obtain expert advice about installation and service.

Your dealer can help you decide which model best suits your needs.
